Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ueno (U.S. 5,299,936). Referring to claim 1, Ueno teaches a dental appliance including a first layer formed from a durable, resilient, elastomeric material having a softening point in the range from 35 to 100 degrees Celsius, and a second layer formed from a durable, non-deformable material having a softening point over 100 degrees Celsius, wherein the second layer comprises a protrusion having a softening point over 100 degrees C, and extends at least 2 mm from the surface.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno (U.S. 5,299,936). Referring to claim 2, Ueno teaches the claimed invention except for the feature of the protrusion being integral. The feature of making an article

formerly in two pieces and put together integral involves only routine skill in the art absent unexpected or undesired results. Referring to claims 3-4, Applicant has attempted to define the device in terms of tooth size which varies from individual to individual. Therefore the location would be a matter of obvious design choice, and based on the figures Ueno appears to teach the claimed positioning and size. Referring to claims 5-10, Ueno teaches the claimed structural limitations. The method steps as claimed occur naturally as a user is fitted with the device, and chews. Specific limitations drawn to length of exercise are considered matters of obvious design choice. Furthermore, normal use of the device will result in both active and passive exercises.
